

## **Poinsettia Care Information**

### **Do not store in sleeve**

- Remove sleeve as soon as the poinsettia reaches its final destination.
- Storing in sleeve will result in a droopy appearance

### **Watering**

- Water thoroughly when soil feels dry to the touch.
- Keep poinsettia moist but not soggy.
- Make sure the pot cover does not hold excess water.
- Don't allow plants to sit in standing water.

### **Lighting**

- Place poinsettias in warm well-lit area.
- Natural lighting is preferred.
- Any light that is good enough to read by is sufficient.

### **Temperature**

- The ideal temperature is between 60-70 degrees.
- Keep poinsettia away from all drafts – warm and cold.
- Don't expose your plant to chilling winds when transporting.
